Nursing Home

Home Care

Rehabilitation Center

The electric lift is versatile enough to use for any and all patient moves. Suitable for homes, nursing homes or hospitals and other places; Transfers may be to and from beds, chairs, floor to bed, lateral transfers, bathing, and toileting.

Product Details

The unit comes with a foldable mast and a wide, stable base for easy storage and transportation, making it ideal for institutional homecare.

Make sure all beds, stretchers, wheelchairs and the lift apparatus are locked when you are not moving them from 1 place to another during this process. One of these items moving away from another could cause the patient a potentially dangerous crash.

Accepts any style sling:

The Battery-Powered Patient Lift can be used with slings with straps. The six-point swivel bar attachment easily adapts to most sling styles and positions.

Each patient is unique, and it is essential to select a sling that best suits the patient for comfort, safety and practicality.
