Figure 2

Figure 3

Figure 1 illustrates the use of the sling and straps to assist a person sitting on the floor. Figure 2 illustrates the use of the sling and straps to assist a person sitting in a wheelchair. Figure 3 illustrates the use of the sling and straps to assist a person sitting on a toilet.

The sling and straps are designed to provide support and stability for a person sitting in a wheelchair or on a toilet. The sling is made of a soft, padded material and is attached to the wheelchair or toilet seat. The straps are made of a strong, durable material and are used to secure the person in the sling. The sling and straps are used to assist a person sitting in a wheelchair or on a toilet who is unable to sit independently.
